Brainstorming

- Brainstorming helps the team **generate multiple ideas to solve the problem**.
- Team members are encouraged to **share creative ideas freely**.
- No idea is rejected during the initial stage.
- The goal is to **explore different possible solutions**.

Ideas Generated During Brainstorming

- Implement a **ServiceNow ticket management system**.
- Create an **automated service request workflow**.
- Develop a **user-friendly portal for raising service requests**.
- Add a **ticket tracking feature** so users can check request status.
- Implement **automatic notifications and updates** for users.
- Use **priority-based request handling** to solve urgent issues faster.
- Create a **knowledge base for common issues**.
- Provide **dashboard reports for administrators**.

Outcome of Brainstorming

- The team selects the **best and most practical solution**.
- The chosen solution focuses on **automation, efficiency, and user satisfaction**.
- ServiceNow will be used to **design and implement the service request management system**.
